

A Hi-Tech solution provider for most waste water problems

# Boost Powder™

**A 3rd generation blend of friendly aerobic bacteria and ingredients that have the following benefits:**

## BENEFITS:

**Digests all organic wastes and sludges ✓**

**Environmentally safe and friendly ✓**

**Neutralises/eliminates all bad smells ✓**

**Cleans the whole system, stops blockages ✓**

**Rapidly forms a viable long lasting biomass ✓**

**Improves overall water quality ✓**

**Saves time and costs ✓**

**Digests Fats/Oils & Greases ✓**

**Enviro Tablets™ Boost powder™** is the all round workhorse of the range.

It is used as a rapid start element to enable the bacteria biomass to form quickly and start dealing with the pollutants. Boost Powder™ is always used to start the remediation process.

The powder contains a more concentrated blend of the essential ingredients which help kick start the process

The powder can also be useful in situations where access to the waste water system prevents deploying the Tablets. The Boost powder also highlights a property of the whole range, that of being able to coat all parts of the system with the bacteria to achieve complete protection.

The product is easily deployed into your system by simply pouring the Powder directly into the Grease Trap or sink. It can be used where no grease trap exists to convert the whole system into a grease remover.

Boost Powder™ is also used as a pipe cleaner in Marine toilet applications and Car washes.

## Natural and environmentally safe & friendly bacteria based water treatment products

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean out Fats/Oils/Grease, organic pollutants, improve water quality, prevent bad smells and acid corrosion in most water systems.

**They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces waste costs.**

The product range consists of our rapid acting Boost Powder™ and a sustained release Tablets tailored for individual circumstances. All products contain AEROBIC Bacteria and “Active Oxygen” which converts the pollutants to water and carbon dioxide. The products also contain all the necessary ingredients to form a “Bacteria Friendly” environment—such as nutrients and buffers to raise the pH value of the water.

### Applications

Grease Traps

Septic Tanks

Waste Water Treatment Plants

Aquaculture & Pond Maintenance

Water based air conditioning Systems

Industrial Food Processing

Marine Sewage Systems

RV Sanitary Systems

Car Washes

### About Us

Enviro Tablets™ is continually researching environmental solutions to solve pollution problems.

We are always looking for effective technologies that can be bought to market.

Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the UK and the USA.

\*Enviro Tablets™ can help you devise the correct “Dosing Schedule” to suit your situation

### WHAT MAKES US DIFFERENT

The built-in special “Active Oxygen” component boost the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen sulphide are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system.

The products are not a “Quick Fix” solution, they require a period of time to establish a viable bio-mass that will coat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular weekly dosing to ensure the bio-mass is kept at full strength.
