

A Hi-Tech solution provider for most waste water problems

# Hyper Boost Powder™

**A 3rd generation blend of friendly aerobic bacteria and ingredients that have the following benefits:**

## BENEFITS:

**Restores highly alkaline water to neutral ✓**

**Environmentally safe and friendly ✓**

**Neutralises/eliminates all bad smells ✓**

**Cleans the whole system, stops blockages ✓**

**Rapidly forms a viable long lasting biomass ✓**

**Digests all organic wastes and sludges ✓**

**Saves time and costs ✓**

**Digests Fats/Oils & Greases ✓**

**Enviro Tablets™ Hyper Boost Powder™** is specifically designed to restore neutral pH values in highly alkaline water as well as offering all the benefits of normal Boost Powder.

The product contains natural acidic ingredients that gently ease the pH values from 9+ back to 7.

It is used as a rapid start element to control the initial pH values and enable the bacteria biomass to form quickly and start dealing with the pollutants.

Hyper Boost Powder™ also highlights a property of the whole range, that of being able to coat all parts of the system with the bacteria to achieve complete protection.

The product is easily deployed into your system by simply pouring the Powder directly into the water system.

**HYPER BOOST POWDER™ IS AVAILABLE IN CONTAINERS OF 7KG OR IN VARIOUS SACHET SIZES**

## Natural and environmentally safe & friendly bacteria based water treatment products

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean out Fats/Oils/Grease, organic pollutants, improve water quality, prevent bad smells and acid corrosion in most water systems.

**They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces waste costs.**

The product range consists of our rapid acting Boost Powder™ and a sustained release Tablets tailored for individual circumstances. All products contain AEROBIC Bacteria and an Oxygen Booster which converts the pollutants to water and carbon dioxide. The products also contain all the necessary ingredients to form a “Bacteria Friendly” environment—such as nutrients and buffers to raise the pH value of the water.

### Applications

Grease Traps

Septic Tanks

Waste Water Treatment Plants

Aquaculture & Pond Maintenance

Water based air conditioning Systems

Industrial Food Processing

Marine Sewage Systems

RV Sanitary Systems

Car Washes

### About Us

Enviro Tablets™ is continually researching environmental solutions to solve pollution problems.

We are always looking for effective technologies that can be bought to market.

Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the UK

\*Enviro Tablets™ can help you devise the correct “Dosing Schedule” to suit your situation

### WHAT MAKES US DIFFERENT

The built-in special Oxygen booster component increases the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen sulphide are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system.

The products are not a “Quick Fix” solution, they require a period of time to establish a viable bio-mass that will coat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular weekly dosing to ensure the bio-mass is kept at full strength.
