Biological Water Solutions

A Hi-Tech solution provider for most waste water problems

MARINE APPLICATIONS

Enviro Tablets™ Marine Applications products are the complete environmental answer to most problems associated with commercial marine Grey and Black water systems and vacuum toilets.

They reduce, or eliminate F/O/G/ and all organic wastes in the grease traps and scuppers, reducing down-time by preventing water based breakdowns and maintenance callouts.

They work in both Black/Grey water systems to enhance the natural bacteria colonies in the activated sludge, which means they digest all the solids (including toilet paper) and neutralise the urine. They remove all the bad smells associated with marine sewage systems.

They work in vacuum toilets and urinals to eradicate bad smells and remove and prevent build up of Urea deposits.

Marine Product Range:

Tablets are available in buckets of 50.

Boost Powder™ comes in 40g sachets or 7kgs buckets.

3rd generation biological products that contain blends of friendly aerobic bacteria and ingredients that have the following:

BENEFITS:

Digests all organic wastes and sludges ✓

Environmentally safe and friendly ✓

Neutralises all bad smells ✓

Cleans the whole system ✓

Works in both Grey and Black water systems ✓

Works in both Vacuum & gravity toilet systems ✓

Removes & prevents Urea build up in pipes ✓

Saves maintenance time & costs ✓

IN USE IN MANY RIVER CRUISE BOATS ✓

Toilet pipe work from a Baltic Ferry before and after treatment with Enviro Tablets Marine Products

Enviro Tablets™ products provide an easily dispensed, environmentally friendly and effective solution

www.enviro-tablets.com 2018

Natural and environmentally safe & friendly bacteria based water treatment products

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean out Fats/Oils/Grease, organic pollutants, improve water quality, prevent bad smells and acid corrosion in most water systems.

They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces waste costs.

The product range consists of our rapid acting Boost Powder™ and a sustained release Tablets tailored for individual circumstances. All products contain AEROBIC Bacteria and “Active Oxygen” which converts the pollutants to water and carbon dioxide. The products also contain all the necessary ingredients to form a “Bacteria Friendly” environment—such as nutrients and buffers to raise the pH value of the water.

Other Applications

- Grease Traps
- Septic Tanks
- Waste Water Treatment Plants
- Aquaculture & Pond Maintenance
- Cooling Tower Systems
- Industrial Food Processing
- Car Washes
- RV Sanitary Systems
- Toilets and Urinals

About Us
 Enviro Tablets™ is continually researching environmental solutions to solve pollution problems. We are always looking for effective technologies that can be bought to market. Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the EU and the USA with a sales office in Asia.

*Enviro Tablets™ can help you devise the correct “Dosing Schedule” to suit your situation

WHAT MAKES US DIFFERENT

The built-in special “Active Oxygen” component boost the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen sulphide are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system.

The products are not a “Quick Fix” solution, they require a period of time to establish a viable bio-mass that will coat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular weekly dosing to ensure the bio-mass is kept at full strength.
