Enviro Tablets™ MultiClean™ is the complete environmental answer to sourcing a CHLORINE FREE multifunctional household cleaner. It deals with all the common problems associated with Domestic and Commercial water systems and is especially designed to work with all commercial and home sewage treatment systems.

The product is a mix of ingredients, including safe aerobic bacteria spores, that enable the deep cleaning effect to work. The product also removes all nasty smells and helps protect the piping!

The product can be used in domestic sinks, toilets, shower basins, food waste disposal units, dishwashers and automatic washing machines. It is also effective in all types of drainage systems, helping to keep pipes clean and free running.

## Natural and environmentally safe & friendly bacteria based water treatment products

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean out Fats/Oils/Grease, organic pollutants, improve water quality, prevent bad smells and acid corrosion in most water systems.

**They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces waste costs.**

The product range consists of our rapid acting Boost Powder™ and a sustained release Tablets tailored for individual circumstances. All products contain AEROBIC Bacteria and natural cleaners which convert the pollutants to water and carbon dioxide. The products also contain all the necessary ingredients to form a “Bacteria Friendly” environment—such as nutrients and buffers to raise the pH value of the water.

### About Us

Enviro Tablets™ is continually researching environmental solutions to solve pollution problems.

We are always looking for effective technologies that can be bought to market.

Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the EU and the USA.

\*Enviro Tablets™ can help you devise the correct “Dosing Schedule” to suit your situation

### WHAT MAKES US DIFFERENT

The built-in special natural cleaning components boost the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to rapidly grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen Sulphide, are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system. The products are not a “Quick Fix” solution, they require a period of time to establish a viable bio-mass that will coat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular dosing, as per pack instructions, to ensure the bio-mass is kept at full strength.
