

Aqua Care™ is the complete environmental answer to all the common water problems associated with domestic Koi and fish ponds, aquariums, commercial lakes and commercial shellfish ponds.

The products consist of our rapid acting Boost Powder™, and sustained release tablets, both come with AEROBIC Probiotic Bacteria and an oxygen booster which converts the pollutants to water and carbon dioxide.

The probiotic bacteria are proven to aid aquatic health and disease resistance. The oxygen booster dramatically increases the dissolved oxygen content of the water and the incorporated buffers help control the pH value at a neutral level.

The products also inhibit algae growth, including blanket weed, by consuming the relevant nutrients the algae rely on to grow.

They also digest all organic wastes and keep the water crystal clear.

An additional major benefit is that Aqua Care™ also controls and removes all bad smells from the water and filter systems and encourages plant growth and insect life.

[For commercial fish ponds please contact us for a customised treatment plan.](#)

A blend of friendly aerobic bacteria and ingredients that have the following:

BENEFITS:

Clears and clarifies the water ✓

Environment safe and fish friendly—even Marine ✓

Neutralises all bad smells from the water & filters ✓

Reduces the need to clean out filters ✓

Stops algae growth including blanket weed ✓

Digests and removes all organic wastes ✓

Increases dissolved oxygen & cleans up plants ✓

Probiotic bacteria boosts fish immune systems ✓

Simple weekly treatment ✓

To see a video showing how safe and effective our products are please go to:

The products are available in the following sizes:

Aquariums and ponds up to 2,000 lts.

Ponds up to 4,000 lts.

Ponds up to 12,000 lts

Ponds up to 20,000 lts.

Natural and environmentally safe & friendly bacteria based water treatment products

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean up all forms of water systems, remove organic pollutants, improve water quality, prevent bad smells and acid corrosion.. **They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces the on-going need for maintenance and cleaning.**

Aqua Care™ consists of a rapid acting powder sachets, and tablets, all with sustained release components that include AEROBIC Bacteria and an oxygen booster which converts the pollutants to water and carbon dioxide. The product will form a “Bacteria Friendly” environment—which provides nutrients and buffers to raise the pH value of the water to prolong equipment life and is kind to all variants of Fish and Filter.

About Us

Enviro Tablets™ is continually researching environmental solutions to solve pollution problems.

We are always looking for effective technologies that can be bought to market.

Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the UK .

*Enviro Tablets™ can help you devise the correct “Dosing Schedule” to suit your situation

WHAT MAKES US DIFFERENT

The built-in special oxygen booster component increases the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen sulphide are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system.

Results should be visible within a short period of time, typically ranging from 4-8 days. The active ingredients require a period of time to establish a viable bio-colony that will treat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular weekly dosing to ensure the treatment works at full capacity.
