Biological Water Solutions

A Hi-Tech solution provider for most waste water problems

CAR WASHES

3rd generation biological products that contain blends of friendly aerobic bacteria and ingredients that have the following:

BENEFITS:

Digests all organic wastes ✓

Environmentally safe and friendly ✓

Neutralises all bad smells ✓

Cleans the whole system ✓

Prolongs tank/brush and pipe life ✓

Allows more recycled water to be used ✓

Lowers conductivity and reduces down-time ✓

Used in many car washes across Europe ✓

Enviro Tablets™ Car Wash products are the complete environmental answer to all the problems associated with all commercial car wash stations.

Reducing, or eliminating F/O/G/ and all organic wastes in the tanks, pipes and brushes and reducing the down-time by preventing water based breakdowns and maintenance callouts.

Lowers water conductivity to eliminate spotting in the final rinse.

They also remove all unpleasant smells and dramatically increase the amount of recycled water that can be re-used, typically from 30% to 65%.

Comes in Tablet and Powder form to accommodate all types of systems. Simply dose the first tank in the recycling system.

Enviro Tablets™ products provide an easily dispensed, environmentally friendly and effective solution

www.enviro-tablets.com 2020

Tablets come in buckets of 200's. The Boost Powder™ comes in buckets of 7kgs or 40g sachets in buckets of 120.

Natural and environmentally safe & friendly bacteria based water treatment products

Other Applications

- Grease Traps
- Septic Tanks
- Waste Water Treatment Plants
- Aquaculture & Pond Maintenance
- Cooling Tower Systems
- Industrial Food Processing
- Marine Sewage Systems
- RV Sanitary Systems
- Toilets and Urinals

The Enviro Tablets™ product range is non-hazardous and environmentally friendly. They effectively clean out Fats/Oils/Grease, organic pollutants, improve water quality, prevent bad smells and acid corrosion in most water systems.

They are highly cost-effective and easy to deploy, requiring no mechanical dispensers, or other equipment. This saves time & money and reduces waste costs.

The product range consists of our rapid acting Boost Powder™ and a sustained release Tablets tailored for individual circumstances. All products contain AEROBIC Bacteria and an Oxygen booster which converts the pollutants to water and carbon dioxide. The products also contain all the necessary ingredients to form a “Bacteria Friendly” environment—such as nutrients and buffers to raise the pH value of the water.

About Us

Enviro Tablets™ is continually researching environmental solutions to solve pollution problems. We are always looking for effective technologies that can be brought to market. Enviro Tablets™ products do “exactly what it says on the label” and have been proven by many industrial and commercial organisations across the world. Our products are manufactured in the UK.

*Enviro Tablets™ can help you devise the correct “Dosing Schedule” to suit your situation

WHAT MAKES US DIFFERENT

The built-in special Oxygen Booster component increases the water’s dissolved oxygen content. This is vital to allow the aerobic bacteria to grow and multiply. The Aerobic bacteria effectively remove the anaerobic bacteria, which by giving off hydrogen sulphide are responsible for the bad smells associated with dirty water. The other components help to raise the pH value of the water which is good for the bacteria and help reduce “Acid Water Erosion” in the pipes of your system.

The products are not a “Quick Fix” solution, they require a period of time to establish a viable bio-mass that will coat the entire system, consume the existing pollutants and deal with the newer pollutants being generated. After this period they require regular weekly dosing to ensure the bio-mass is kept at full strength.
